We will design specially for the required lifting height

Bowl rotation at any height

Automatic bowl unlock

Quick bowl fixing system

Powered by efficient batteries

Stable firm structure

Easy and smooth lifter operation

Model HUB-3

bowl rotation
at any height

modern efficient
batteries

simple and safe
control

easy tilting lifter
handling

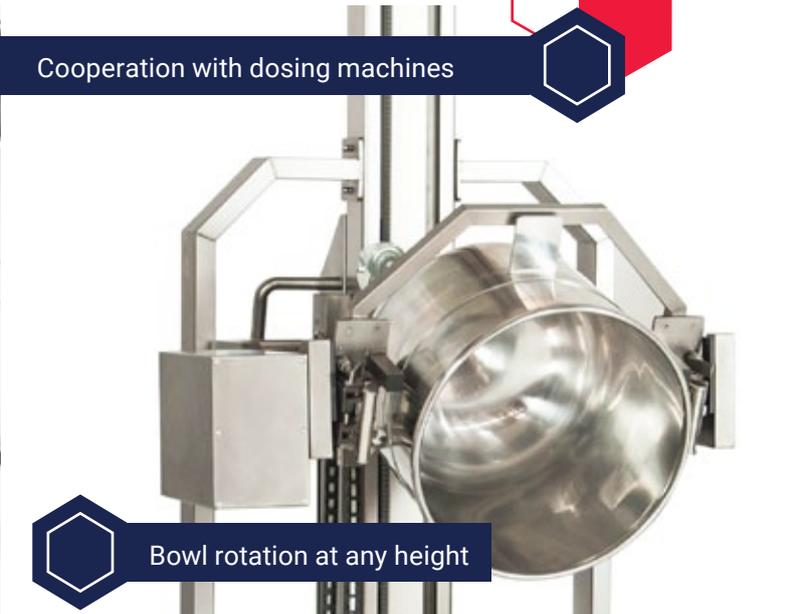

AISI 304
stainless steel

- A mobile castor device, easy to move.
- Bowls lifting and rotating at any height with installed drives.
Powered directly by batteries, it is not necessary to connect the device to a constant current source.
- Quick battery charge – optionally, the system of fast battery changeover will ensure continuous operation, even multi-shift one.
- A simple control panel with lifting/lowering and rotating buttons.
- Protection against accidental activation.
- A battery charge indicator keeps the user informed about the remaining power or the necessity to charge the batteries.
- The 'smart' automatic system for switching the machine off in the absence of work protects the batteries against accidental and excessive discharge.
- The bowl fixing system for quick and safe fixing of the bowl in the clamp to minimise the required time.
- Collection of the bowl from the trolley or floor without the need of manual lifting and automatic lock while lifting.
- Automatic bowl unlock when lowering on the lifter/floor.
- Perfect design – a stainless steel structure.

Key functions

Separate lifting and rotating drive

Bowl rotation at any height

Bowl ejection lock

Automatic bowl protection

Quick battery charge

Separate control: rotating, lowering, lifting

3 MODELS SPECIALLY FOR YOUR NEEDS

Tilting lifter HUB

A perfect solution that significantly facilitates and accelerates operating personnel work, without the necessity of lifting and rotating the bowl to pour pastry into another dosing or portioning machine, e.g. Multidrop/Dozer.
