**WATER SPRAY SYSTEM AND SEED APPLICATOR**

## WATER SPRAY SYSTEM AND SEED APPLICATOR FOR BAKERY PRODUCTS

## DECORATING EQUIPMENT BAKERY WATER SPRAYER AND SEEDER

The device is dual-purpose, which allows sprinkling rolls and applying seeds. Thanks to it, the process of preparing rolls will become much easier and more effective.

The device has a special nozzle for spraying rolls with water, which ensures even moistening of the surface of the rolls.

In addition, it is equipped with a container with seeds and a mechanism that allows the seeds to be evenly applied to the rolls.

Thanks to this device, you can get perfect rolls with seeds without unnecessary hassle and waste of time.

# WATER SPRAY SYSTEM AND SEED APPLICATOR FOR BAKERY PRODUCTS

## TECHNICAL INFORMATION

- The device is used to spray Ciabatta rolls with running water
- Made of stainless steel
- Inverter driven device
- Transportation of rolls by using round belts made of plastic Type RLC-5 with a diameter of 5 mm
- The device collects running water, which is transported to the humidification nozzles
- The set includes 9 nozzles - 4 from above, 5 from below
- The water flows into the tank, which must be discharged to the sewage system every several cycles
