TECHNICAL DATA

Model: HUB-1
Bowl volume: max 100 l *
Battery capacity: 350 W
Pojemność akumulatora: 2 pcs 12 Ah each
Runtime: about 8 h
Charging: 230 V
Dimensions: 450 x 756 x 1415 H [mm]
Weight: 83 kg
Max lifting height: 1100 [mm] *
Leg span: 370 / 510 [mm] *
** possible customisation as needed*

NO MORE LIFTING HEAVY BOWLS!!!!

Lifter HUB-1

You know well how hard it can be to work in a bakery and confectionery. Lifting bowls, bags and boxes affects work performance, and it often happens it may consequently lead to injuries and medical leaves.

Now, it is difficult to find employees and keep them employed. It is the owner's responsibility to improve working conditions.

A healthy and satisfied team of your employees is the key to your success and company growth.

With a modern solution which is the automatic lifter, bowls are effortlessly collected from the beaters, then they are transported to the workplace and lifted to pour the pastry to moulds or trays.

HUB-1 operates fully independently and is powered by modern gel batteries of a long lifetime. The battery indicator keeps the user informed about the remaining power. When you finish your work, connect HUB-1 to the power supply source of 230V to charge it automatically.

The versatility of HUB-1 is also reflected by its extendable legs, the width of which can be adjusted to the beater model actually used. It is suitable for operation with bowls up to 100 litres.

The bowl lifting plate is removable and interchangeable, so the lifter can be used to handle other 'weights' such as bags, boxes, packages of sheets and baking moulds.

TROLLEY LIFTER FOR BOWLS HUB-1

FACILITATE WORK OF YOUR STAFF

INCREASE PERFORMANCE THROUGH ONE-MAN OPERATION

NO MORE LIFTING HEAVY BOWLS!!!!

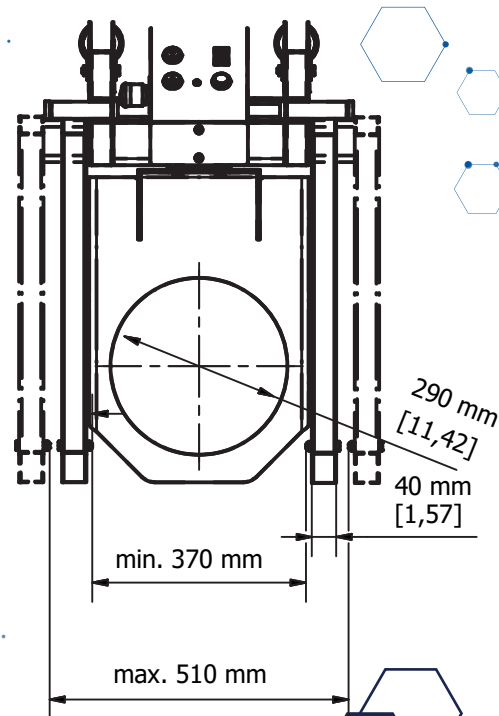

Collecting the bowl directly from the beater without moving it by hand.

Lifting up to the ergonomic work height and automatic lowering.

Effective operation in every place of your plant owing to the battery power supply.

Super easy to move – a mobile castor lifter.

Aesthetic stainless steel design – smooth device moulds easy to keep clean.
